

CMMC Pre-Assessment Services

Streamline Your Path to CMMC Certification

In the world of defense contracting, cybersecurity isn't a choice—it's a critical mandate.

The Department of Defense (DoD) has made it clear: Cybersecurity Maturity Model Certification (CMMC) is no longer just a recommendation—it's a requirement for all DoD contractors and subcontractors.

Without CMMC certification, your organization risks missing out on lucrative contracts and critical partnerships in the competitive DoD space.

Expert Guidance for Your CMMC Journey

At IGI Cybersecurity, we recognize that the CMMC process can be tedious and demanding. Our team of certified Registered Practitioners Advanced (RPA) designees is here to help, bringing unparalleled expertise to guide you through the complexities of successfully achieving CMMC compliance.

Benefit from comprehensive support as you prepare for your certification process:

- **Pre-Assessment Readiness:** Our team will perform a thorough gap analysis of your cybersecurity policies, procedures, and practices compared to CMMC requirements, and create a customized roadmap to guide you towards successful certification.
- **Pre-Assessment Remediation Guidance:** Our team can assist you in developing a detailed Plan of Action and Milestones (POAM) tailored to your organization's requirements, providing invaluable insights and guidance to navigate your remediation process with confidence.

Don't wait until the deadline approaches. Take proactive steps now to navigate your CMMC journey efficiently and effectively with IGI Cybersecurity.

Safeguard your operations, protect critical data, and propel your organization towards success in the defense marketplace.
